In claim 1, line 12 "an" has been replaced with --a--.

Allowable Subject Matter

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest either alone or in combination a method for connecting a connecting surface of a first silicon wafer with a connecting surface of a second silicon wafer was so as to form an insulated cavity after assembly as recited by independent claim 1, particularly depositing a first group of alloy soldering bumps on the connecting surface of the first silicon wafer, the first group of alloy soldering bumps being separated from one another by an even distance which is sufficiently small to

cause joinings during the assembly of the two silicon wafers, the deposition of the soldering bumps being carried out during the step of depositing the soldering bumps intended for the electrical contacts, and depositing a second group of alloy soldering bumps on the connecting surface of the first silicon wafer, the second group of alloy soldering bumps being separated from one another by a distance which is sufficiently large to prevent joinings during the assembly of the two silicon wafers.
